

Remote Viewing Intensive (Levels I, II & III)

(May 25 – 31, 2015)

Ocean Resort & Spa ~ Campbell River, Vancouver Island

In this special full-immersion residential program, participants learn the proven protocol created by the Stanford Research Institute for U.S. Military Intelligence's former 'Top Secret' program *Project Star Gate*.

Level I

Level I is the introductory stage of *Star Gate's* Remote Viewing protocol. Beginning with personalized instruction along with increasingly challenging remote viewing sessions, students are carefully guided through Stages 1, II and III of the original Ingo Swann methodology.

Very early on, students quickly become aware of the importance of creating a solid foundation for developing their innate ability to tap into the matrix of consciousness in which ordinary humans have access to all information in the universe.

Level II

In the Level II portion of the program, students learn the more advanced protocols of phases 4, 5, and 6, before entering into the ethereal mist of the "collective unconscious" in the deeply altered states of *Extended Remote Viewing*.

The protocols and structure of CRV are expanded into widely enhanced perceptions of aesthetics, emotions, intangibles, and even the very heart of the viewer's own soul. Viewers' sketches and perceptions become more detailed and students often feel a sense of bi-location or flight to the target site. In this stage, students learn new remote viewing applications such as map-dowsing and object remote viewing, in addition to challenging live out-bounder sessions and actual operational targets.

Level III

Level III brings it all together. During this advanced portion of the program, students learn to move confidently into the deep ethereal realms of mind and spirit. Graduates are encouraged to leave behind any perceived limitations of their intuitive abilities, expanding into a new understanding of who they really are.

As initiates experience the widening parameters of their own consciousness, they are challenged to apply their remote viewing skills to real life operation targets such as humanitarian missions, missing persons, police files, and unsolved crimes. Employing the use of advanced psychic tools for information retrieval including the prediction of future events, students are challenged on a unique array of targets, learning to utilize the art and science of remote viewing to achieve an elevated level of awareness.

Tuition: \$1,695. (Includes all seminar activities, meals, lodging, and local airport/ferry shuttle service)
